

Technical Rider Cie Paris Bénarès « Les Eclaireurs »

Location:

We have to make a location scouting of the route before being able to validate it definitively. It can be done the day or the morning before the show, depending when the team arrives.

Assembling :

Assembling : 2 hours

Dismantling : 1 and a half hour

Ground area needed for assembling : 8m * 8m

We need 2 people to give a hand at the beginning of the assembling and at the end of the dismantling for about 15 minutes.

Size of the machine :

Height: 4,73 meters

Width: 2,45 meters

Length: 4,32 meters

Weight: approximately 1 ton

Constraints:

It's difficult for the giant puppet to pass any pavement or holes, it's possible but we need certain settings to perform well. We need to know if the ground is slopy.

Verify that there's no cables, decorations or others, cross the street less than 4,75 meters high.
